SUPER MUL - T - LOCKS, PADLOCKS.

All containers are made of zinc or aluzinc coated steel. They are then powder coated on every color available in RAL basic range. The steel and coating we use protects the containers against weather conditions and remaining environmental factors.

All of our containers are painted inside and outside with the same method.

We can perform any individual order according to the documentation we receive from the Customer, or our own as well as propose structural improvements and solutions which will meet your expectations.

Efficient and safe body equipped with a removable shackle padlock (removable shank). The keys may copied after the key card is provided.
